- **【PURE GRAPHITE CRUCIBLE】** - The crucible is made of pure graphite to ensure high heat resistance. The crucible is formed by rotation so that the stability of the mineral is wholly maintained. The groove design facilitates the pouring and filling of the melt.
- **【HIGHLY ADVANCED PID MODULE】** - The silver melting furnace is equipped with an advanced PID module and digital control system to provide accurate and convenient metal melting. The highest adjustable temperature of our product is 1150 degrees Celsius, which is monitored every 2 seconds without overheating or cooling.
- **【HEAT-RESISTANT DESIGN】** - Uses heat-resistant and useful insulation materials. Radially arranged heating elements are fully functional and produce a uniform temperature distribution in the melting crucible. High performance and effective insulation ensure that the required melting temperature is reached quickly.
- **【INSULATION GRID & TONGS】** - Insulation grids prevent accidental contact with the heating chamber. The melting crucible is equipped with a melting clamp which fits into the groove around the crucible head, allowing you to use the hot melt crucible safely.
- **【EXTENSIVE USAGE SCENARIO】** - When the gold melting furnace runs without a crucible(with the cover on), it can reach more than 1000 degrees Celsius in about 12-20 minutes; When the crucible is placed, it needs 20-30 minutes to reach that degrees. This furnace using premium materials can meet industry and workshops' requirements, which are suitable for processing precious metals such as gold, silver, and copper.

2 KG Digital Automatic Melt Furnace

The 2 kg digital automatic melt furnace with compact design is ideal for professional use. By using high-quality materials, the smelting furnace can meet the requirements of the industry, and the workshop, are suitable for the processing of precious metals such as gold, silver, and copper.

- Premium Crucible
- Highly Advanced PID Module
- Heat-Resistant Design
- Insulation Grid & Crucible Tongs

VEVOR®

Tough Equipment & Tools, Pay Less

VEVOR is a leading brand that specializes in equipment and tools. Along with thousands of motivated employees, VEVOR is dedicated to providing our customers with tough equipment & tools at incredibly low prices. Today, VEVOR has occupied markets of more than 200 countries with 10 million plus global members.

Why Choose VEVOR?

- Premium Tough Quality
- Incredibly Low Prices
- Fast & Secure Delivery
- 30-Day Free Returns
- 24/7 Attentive Service

High-Temperature Material

High-purity graphite crucible, with characteristics of heat resistance, acid and alkali resistance, aging resistance, etc., Automatic Melt Furnace has a long service life.

Digital Control System

Digital Melting Furnace Machine Equipped with advanced digital control system, accurate and convenient metal melting, avoiding overheating or cooling problems.

High Efficiency

The highest adjustable temperature of aluminum melting furnace is 1150 degrees Celsius, high-temperature resistance, fast and efficient heating.

Heat Insulation Grid

Electric Casting Refining Furnace has a heat Insulation grid, which prevents accidental contact with the heating chamber.

Crucible Tongs & Double Handle

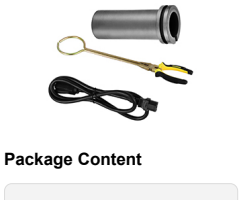

Crucible pliers are made of high-quality materials, which are rust-proof, & durable. Metal casting machines features double handle design, compact body, easy to carry.

Wide Application

Copper Melting Furnace is an ideal furnace for industrial and workshops professional use, suitable for smelting processing of gold, pure silver, pure copper, and aluminum.

William Sanchez

Color: Red Capacity: 2 kg

★★★★★ Cheap and works great

Everything works very well, just as described. I use this to melt down scrap metal for lost wax casting, and this suits my needs perfectly. I can set it running and leave it to get to work melting everything down and come back when it_ ready to go. Very compact and clean. Really easy.

Dennis Turner

Color: Red Capacity: 2 kg

★★★★★ easy to use

I used it to melt old bits of copper water pipe and added tin to make bronze. Had to cut the copper up small to fit enough into the crucible but it worked fine. I'd never done anything like this before so I was surprised how easy it was. Making the moulds is much harder. Goin to try it with some aluminium next

A. Higgott

Color: Red Capacity: 2 kg

★★★★★ Very good value for quality of it

My teenage son wanted to experiment melting metals. I purchased cheaper thing of ebay which was absolute rubbish tbh. When we received this it was clear it was much better quality and came with everything needed. Heated relatively quickly and had accurate temperature readings. Son was very happy though now the novelty is over I wonder when he will experiment again lol...
